Repair & Service Loosen & Lubricate Clean & Care Protect & Maintain

# Caramba.

To facilitate good work,  
making it easier and  
more efficient.

## Professionals

have special requirements. Often under time and cost pressure, first-class results must be reliably delivered. This is exactly where the Caramba Profi-Line comes in. Optimal cleaning, dissolving, lubricating and protecting in different technical environments: Caramba stands for tasks that have been solved with confidence millions of times over. Our holistic solutions have a common DNA.

Caramba products ...

- › act first class
- › make work easier
- › save time in application
- › are easy to use
- › ensure value retention
- › promote trouble-free function
- › are characterised by high yield and economy
- › meet the required norms and standards
- › provide security of a large and well-known brand

Build on the power  
of the brand of the  
century

Caramba is a German brand everyone in trade and industry knows. The invention of the spray oil and patenting of the trademark in 1903 marked the beginning of a fascinating success story that continues to be written.

- › Special chemistry for practically every professional application.
- › Research, development and production in Germany.
- › Quality you can always rely on.

Caramba simply is and remains a brand that earns the trust of even the most demanding users.

## Technical trade, users and Caramba: Successful connections that pay off

Based on our many years of experience, close contact with users and companies, and extensive market research, we know exactly what really matters in technical applications. We supply the chemical specialists to this end – with a range of classic products that have proven themselves over decades, through targeted product optimisations and innovative high-tech solutions. All this from our own research and development.

Caramba makes sure that the chemistry is right – for the technical trade and the professionals who use our products.

In this catalogue you will find all the key information to help you succeed with our products. Compact and clearly arranged according to the typical areas of application in industry and trade they can be found easily using the clearly arranged page index.

Our experts will be happy to advise you at any time if you have further questions.

# Three categories, one clear structure: The Caramba Profi-Line

Active, Intensive and High Performance: We divide our Profi-Line products into three categories, which make the special features of the respective recipe directly recognisable as an addition to the product name.

## Active

Here you can practically watch the products at work – their effect is visibly demonstrated Caramba Active Rim Cleaner, for example, changes colour from colourless to deep red when it takes effect.

## Intensive

Intensive stands for the effectiveness that you can always count on with Caramba. The products deliver what they promise. Powerful, targeted, fast – without ifs and buts.

## High Performance

In this category you will find our chemical high-tech solutions. They are based on particularly innovative product formulas and sophisticated production processes that are not easily copied. As a result, the products deliver absolute high performance in their respective speciality.

<b>Repair &amp; Maintenance</b>	<b>6</b>	Rim cleaner	30
Wire rope and gear wheel grease	8	Perfect Climate	31

# Repair & Maintenance

## Maintain, improve and restore functions with Caramba

The trouble-free and durable functioning of machines and systems is crucial for efficient operation. Added to this is the high importance of operational safety; value retention is also elementary, as machines often represent a large investment. Consequently, there is no way around professional maintenance and repair.

Caramba has developed a high-performance product range for precisely this purpose, on which you can rely 100%. The top specialists from the Caramba Profi-Line lubricate even under difficult conditions, protect against corrosion, facilitate assembly and much more. Caramba thus supplies top-quality chemicals for full repair and maintenance support as required.

## High-performance grease with PTFE

Makes moving components on machines and systems literally run like clockwork: The high-performance grease with PTFE is an extremely versatile lubricant for professional use that is also approved for the food processing industry.

Powerful and resilient

- Strong lubricant
- Even under pressure and extreme temperatures
- Corrosion protection with resistance to salt water and chemicals

The odourless grease with PTFE penetrates even inaccessible corners with its extremely good penetrating ability and scores with strong dry lubrication and emergency running properties. It also plays to its strengths, especially with machines in continuous operation.

Page 9

## High-performance Chain spray

The perfect helper for workshops when it comes to chains: Caramba high-performance chain spray is the professional's choice for the maintenance of chains that are subjected to heavy loads and run at high speeds.

Lets motorbike and other chains run and run

- Lubricant with long-lasting effect
- Prevention against elongation
- Corrosion protection

With its high penetrating capacity, the chain spray is effective even in hard-to-reach areas. In everyday use, it confidently withstands extreme temperatures, is not affected by splash water and also adheres at high revolutions.

Page 12

### High-performance Wire rope and gear wheel grease

When things have to run: Thanks to the graphite content, the special grease lubricates even under high loads and ensures emergency lubrication up to +450 °C.

**Applications**

- For heavy-duty bearings, steel ropes, cranes, elevators, escalators, etc.

**Special properties**

- Black, graphite-containing high-pressure grease
- Prevents the cold welding of surfaces at high pressure
- Resistant to salt and spray water
- Resistant to light acids and alkali

Penetrating properties	Rust dissolving
Lubricating properties	Corrosion protection
Moisture displacement	Temperature resistant -30°C to +450°C

500 ml | Pack of: 6 | Order No. 64540001

### High-performance Copper spray

The strong assembly lubrication that works even when it gets hot. It makes work easier and protects components from assembly damage such as tearing off.

**Applications**

- Provides high-temperature resistant protective and sliding coating on pipe, flange, exhaust, combustion chamber fittings etc.

**Special properties**

- Protects against corrosion, friction and seizing
- Eases assembly and disassembly
- Against noises and vibrations
- Resistant to acids, lyes & salt water
- Do not use for ABS & ESP systems

Penetrating properties	Rust dissolving
Lubricating properties	Corrosion protection
Moisture displacement	Temperature resistant -30°C to +1100°C

500 ml | Pack of: 6 | Order No. 60268505

### High-performance White spray grease

See immediately what is lubricated: The versatile lubricant for heavily stressed parts such as linkages, ball bearings, chains etc. is specially coloured white for this purpose.

**Applications**

- Lubricant
- Corrosion protection

**Special properties**

- Ideal visual control thanks to white colouring
- Extremely resistant to throwing off and water
- PTFE components

Silicone-free

Penetrating properties	Rust dissolving
Lubricating properties	Corrosion protection
Moisture displacement	Temperature resistant -30°C to +150°C

500 ml | Pack of: 6 | Order No. 6071851

### High-performance Grease with PTFE

The grease is extremely penetrating and pressure-resistant and is also ideally suited for the maintenance of complex machines with continuous operation.

**Applications**

- Lubricant with PTFE
- Odourless and neutral

**Special properties**

- Excellent emergency running properties
- Resisting to chemicals and salt water
- PTFE components
- Approved for use in the food processing industry (NSF H2)

NSF

Silicone-free

Penetrating properties	Rust dissolving
Lubricating properties	Corrosion protection
Moisture displacement	Temperature resistant -30°C to +250°C

500 ml | Pack of: 6 | Order No. 64181601

### High-performance Copper paste

The anti-seize and assembly paste for professionals – for high-stress components of screwed connections to gear wheels and turbines to cylinder heads.

**Applications**

- Provides high-temperature resistant protective and sliding coating on pipe, flange, exhaust, combustion chamber fittings etc.

**Special properties**

- Protects against corrosion, friction and seizing
- Eases assembly and disassembly
- Against noises and vibrations
- Resistant to acids, lyes & salt water
- Do not use for ABS & ESP systems

Penetrating properties	Rust dissolving
Lubricating properties	Corrosion protection
Moisture displacement	Temperature resistant -30°C to +1100°C

200 ml | Pack of: 6 | Order No. 60268176

### High-performance Ceramic paste

This special paste keeps highly stressed metallic connections in good condition, lubricates, separates and protects.

**Applications**

- Versatile fitting and anti-seize paste

**Special properties**

- For highest demands
- Prevents cold welding, seizing, corrosion and wear
- Suitable for metal components made of stainless steel, zinc, aluminium, copper, etc.
- Extremely adhesive and resistant to throwing off
- Resistant to hot and cold water
- Free from metal
- Non-conductive

Penetrating properties	Rust dissolving
Lubricating properties	Corrosion protection
Moisture displacement	Temperature resistant -20°C to +1400°C

200 ml | Pack of: 6 | Order No. 6905061

### High-performance Adhesive lubricant

For demanding tribological tasks: the ideal lubricant for wire ropes, gear wheels, linkages, rollers, joints, hinges, guideways and more.

**Applications**

- Adhesive lubricant

**Special properties**

- Lubricant with excellent adhesion for parts exposed to high pressure, shocks, etc.

Penetrating properties	Rust dissolving
Lubricating properties	Corrosion protection
Moisture displacement	Temperature resistant -25°C to +180°C

500 ml | Pack of: 6 | Order No. 64190501

## High-performance Throttle valve and intake cleaner

If, for example, the engine does not run at all or does not want to run smoothly because of dirt in the intake tract, this cleaner will get it going.

### Applications

- Cleans fuel injectors, intake systems, throttle valves, and valves

### Special properties

- Dissolves coked residues and gum
- Improves emission values and prevents performance loss
- Suitable for petrol and diesel engines
- Reaches hard-to-reach locations with an optional separate spray probe

500 ml | Pack of: 6 | Order No. 609705  
 Probe | Pack of: 6 | Order No. 683006

## Intensive Freeze spray

The versatile freeze spray helps with the assembly of cumbersome metal parts, troubleshooting, cleaning & more.

### Applications

- Troubleshooting in electronic areas, monitoring of temperature sensors and engine components, shock freezing of rubber, foils and sticky residues, for repair purposes in industry, etc.

### Special properties

- Fast cooling to -40 °C
- Evaporates without residues
- Flammable
- Odourless

500 ml | Pack of: 6 | Order No. 690019

## High-performance Engine and case sealing compound, red

The particularly temperature-resistant specialist reliably re-seals during assembly and repair work on engines and a wide variety of enclosures.

### Applications

- Permanently elastic and heat-resistant silicone sealant

### Special properties

- Good resistance to chemicals, non-shrinking
- No shrinkage
- Adheres well on metal, glass, enamel, ceramic, aluminium, painted wood, etc.
- Not suitable for concrete, natural stone, lead, copper, galvanised steel, PP, PE, PTFE, bitumen substrates and insulating glass
- Acetate cross-linking

Temperature resistant  
 -60 °C to +260 °C, up to +300 °C (short term)

200 ml | Pack of: 6 | Order No. 690015

## High-performance Engine sealant black

Use for many repair jobs: Engine parts and casings can be professionally and specifically sealed with the high-performance sealant.

### Applications

- Permanently elastic silicone sealing compound

### Special properties

- Good resistance to chemicals, non-shrinking
- Permanently elastic and no shrinkage
- Seals engines, gearboxes, oil sumps, cases, containers, etc.
- Not suitable for concrete, natural stone, lead, copper, galvanised steel, PP, PE, PTFE, bitumen substrates and insulating glass
- Acetate cross-linking

Temperature resistant  
 -50 °C to +180 °C

200 ml | Pack of: 6 | Order No. 690025

## High-performance Contact spray

On ignition distributors, cables, connectors and spark plugs: The spray reliably ensures contact with its strong moisture displacement.

### Applications

- Eliminates electrical malfunctions caused by moisture

### Special properties

- Cleans with a long-lasting effect
- Moisture-displacing

Penetrating properties

Lubricating properties

Moisture displacement

Rust dissolving

Corrosion protection

Temperature resistant

-50 °C to +180 °C

500 ml | Pack of: 6 | Order No. 60091703

## High-performance Battery terminal grease

Professionally terminal connection ensured: This powerful grease provides high material protection and promotes smooth battery operation.

### Applications

- Protects battery terminals and clips against oxidation

### Special properties

- Improves the current flow
- Prevents voltage losses and malfunctions

Penetrating properties

Lubricating properties

Moisture displacement

Rust dissolving

Corrosion protection

Temperature resistant

-30 °C to +85 °C

5 g | Pack of: 25 | Order No. 64570051

**Active**  
**Leakage detection spray**

To make sure that even small leaks do not go undetected: This effective spray visibly tracks them down by forming bubbles.

**Applications**

- Detecting leaks in gas and air pressure systems, for plastic and metal pipes

**Special properties**

- Reliable use by all gas installation companies and test facilities
- Safe for seals or gaskets
- Non-flammable
- Not suited for oxygen lines!
- German DVGW-approved according to DIN EN 14291

Temperature resistant  
-15 °C to +50 °C

400 ml | Pack of: 6 | Order No. 60320510

**High-performance**  
**Brake service spray**

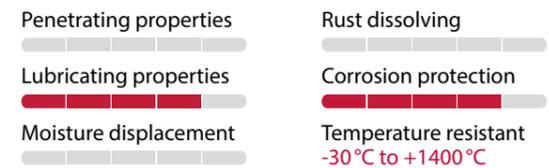

This spray is the professional remedy for squeaking brakes that also effectively protects against corrosion.

**Applications**

- Special lubricant for brake maintenance

**Special properties**

- Suitable for ABS brakes and ESP
- Does not drip, dielectric
- Permanently splash and salt water resistant
- Free from metal

500 ml | Pack of: 6 | Order No. 60158605

**High-performance**  
**Welding protection**

Welding spatter can hardly be avoided completely, depending on the type of welding. No problem, because this spray protects the workpiece and welding nozzle and makes cleaning easy.

**Applications**

- Protects against weld spatter
- Prevents damage to workpieces

**Special properties**

- Non-flammable propellant for safe welding in hollow spaces
- Perfect for arc and gas-shielded welding on steel, aluminium, and stainless steel

Silicone-free

400 ml | Pack of: 6 | Order No. 60308505

**High-performance**  
**Assembly aid and lubricant**

The strong help that saves strength: The lubricant makes the installation of window seals, convertible top seals etc. considerably easier.

**Applications**

- Aid for installing rubber seals

**Special properties**

- Colourless
- Harmless to all plastics
- Improves the sliding of seals
- Leaves no lubricating residues
- Easily biodegradable

Silicone-free

10 l | Pack of: 1 | Order No. 6136001

**High-performance**  
**Silicone spray grease**

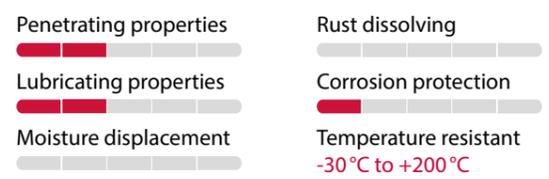

Pure versatility: The professional spray grease lubricates roller bearings, slide rails etc., it is water-repellent and also powerful in electrical switch maintenance.

**Applications**

- Adhesive lubricant and protective agent

**Special properties**

- For metal, plastic and rubber
- With high silicone content
- Good long-term insulator for electrical plug-type connectors
- Approved for use in the food processing industry (NSF-H1)

500 ml | Pack of: 6 | Order No. 6074001

**High-performance**  
**Chain spray**

The high-quality spray is the specialist for the maintenance of chains in professional use – for smooth operation and long service life.

**Applications**

- Protects against wearing, elongation and corrosion
- For motorbike and other high-speed drive chains

**Special properties**

- Fully synthetic colourless grease
- Throw-off and splash water resistant
- Suitable for O-, X- and Z-rings

500 ml | Pack of: 6 | Order No. 60628501

# Rust dissolving, Oiling & Lubricating

## These professionals keep things moving

Every day, Caramba rust removers, multi-oils and specialists are used thousands of times in industry and trade. Whether on machines and vehicles, on plants and equipment, whether on components and products: With Caramba, loosening, lubricating and protecting is particularly easy and efficient. There is hardly a problem that Caramba with its high quality and pronounced effectiveness does not tackle quickly, cleanly and permanently. The tasks decide.

Caramba's range includes multi-talents – including the legendary original "Super", of course – as well as top specialists. Even if seized injection nozzles or injectors must be loosened or if everything has to go smoothly during machining, Caramba has the optimal product solution.

## Super

### The original multi-function spray

Caramba Super is the classic among the multi-oils. Generations of professionals have reached for the original, and with its innovative multi-formula it inspires users in industry and commerce. Its versatility in daily technical use is the strength that has made it famous.

Super convinces in all disciplines

- Rust Remover
- Contact spray
- Corrosion protection
- Lubricant
- Cleaner

It scores with its very good lubricating properties and makes connections permanently reliable. Due to its high moisture displacement, it acts as a reliable contact spray – thus protecting e.g. in electrical installations against malfunctions caused by moisture. The high-quality oil film also has a preventive effect against corrosion.

Page 19

## High-performance Rasant rust remover

Stubborn rust – no problem for Rasant!  
When something is so stuck due to rust that it threatens to tear off or you already want to reach for the angle grinder, the legendary specialist Rasant brings the solution. Extremely fast and reliable.

Rasant concentrates on the essentials

- Extremely fast rust remover

With its extraordinary capillary force, it penetrates rusted areas and makes screwed connections, etc. movable again. Rasant simply makes work easier – and avoids damage that could quickly occur through the use of force on construction, work and machine parts.

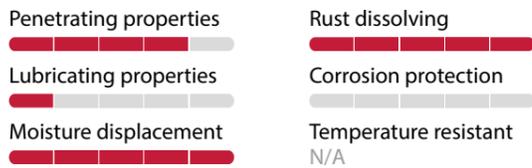

Page 17

## Active Cold shock rust remover

The extremely fast rust remover creates fine cracks in the rust structures through cold shock, the active ingredient immediately penetrates deeply, and rusted screw connections are loosened in an instant.

- Applications
- Fast-acting rust remover through cold shock
- Special properties
- Shock icing up to -35 °C
  - This cold shock causes microcracks in the rust structure allowing the active agent to penetrate faster and deeper.
  - With PTFE, thus gentle on materials

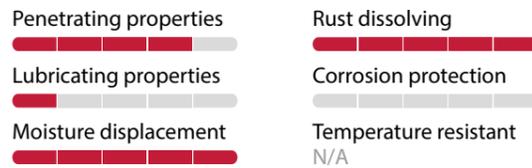

500 ml | Pack of: 6 | Order No. 6610001

## High-performance Special injector solvent

This specialised helper combines cold shock and high-quality active substances and thus facilitates the removal considerably.

- Applications
- Special solvent for stuck injection nozzles and injectors in engines
- Special properties
- Cold shock up to -30 °C
  - Fast and deep penetration of the active ingredient
  - Good sliding behaviour due to PTFE
  - Efficiently dissolves and removes dirt crusts, oil residues, gumming, etc.

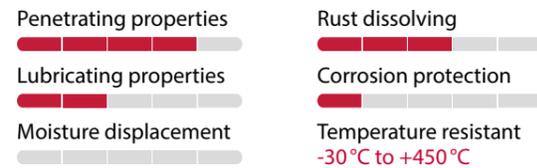

500 ml | Pack of: 6 | Order No. 6610050

## High-performance Graphite oil

This multi-oil has particular strengths in lubricity under high temperatures and in humid environments. The graphite content ensures this.

- Applications
- Lubricant · Rust remover
  - Penetrating oil
- Special properties
- Good lubricating properties
  - Ideal lubricating effect for humid atmospheres
  - Higher lubrication performance of the graphite with temperature increase
  - Electrically conductive

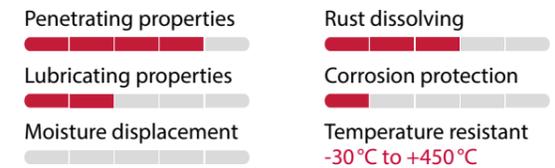

500 ml | Pack of: 6 | Order No. 6003071  
5 l | Pack of: 2 | Order No. 660450

## Intensive Rust remover MoS<sub>2</sub>

The economical all-rounder: When sound versatility is required in professional use, MoS<sub>2</sub> comes into play.

- Applications
- Rust remover · Lubricant
  - Penetrating oil
- Special properties
- Rust dissolving
  - Protects particularly reliably against wear
  - Good lubricating properties
  - Suitable for ultra-high vacuum

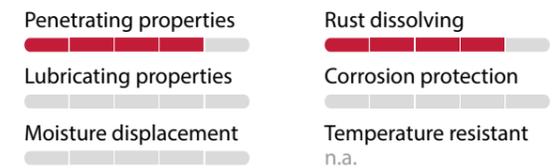

500 ml | Pack of: 6 | Order No. 6002081  
5 l | Pack of: 2 | Order No. 60028847

## High-performance Rasant rust remover

Our specialist for seemingly hopeless cases quickly gets even stubbornly rusted connections moving again.

- Applications
- High-performance rust remover
- Special properties
- Dissolves rust very quickly
  - Excellent penetrating properties
  - Effective against glue residues, encrusted dirt and resin formation

500 ml | Pack of: 6 | Order No. 6007081  
5 l | Pack of: 2 | Order No. 6007051

## High-performance PTFE Spray

To make sure things are moving even under pressure, cold and heat – ideal, for example, for sliding rollers, bolts, bearings and seals that need to remain reliably movable under stressful conditions.

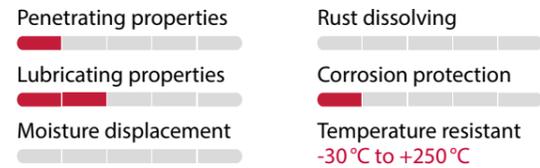

### Applications

- Versatile lubricant and preservative on a synthetic basis

### Special properties

- Excellent lubricating properties at high pressure and extreme temperatures
- Resistant to chemicals
- Non-conductive
- PTFE components

Silicone-free

500 ml | Pack of: 6 | Order No. 60278505

## High-performance Universal spray H1

This all-rounder convinces as a fine lubricating oil and, for example, for the professional care of tools and parts.

### Applications

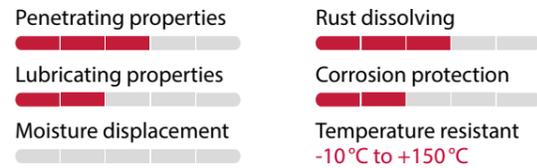

- Lubricant · Corrosion protection
- Rust remover · Metal care product

### Special properties

- Effective fine lubricating oil
- Water-repellent and protects against corrosion
- Removes oil and grease-containing soiling
- Conserves tools and metal parts
- Without solids
- Approved for use in the food processing industry (NSF-H1)

Silicone-free

500 ml | Pack of: 6 | Order No. 622105

## High-performance Silicone spray

The all-rounder makes jammed or squeaky connections work again and ensures value retention and longevity through its care effect.

### Applications

- Multifunctional lubricant and care product

### Special properties

- For metal, rubber, plastics
- High water resistance prevents unwanted freezing
- Approved for use in the food processing industry (NSF H2)
- Available with double spray head (DSK)

500 ml | Pack of: 6 | Order No. 6103051  
500 ml | Pack of: 6 | Art. no. 6103251 (with DSK)

## Super

The original multi-function spray

If only one product is needed, it should be this one. Super is the classic that sets standards in many disciplines every day.

### Applications

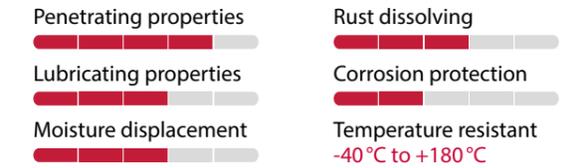

- Rust Remover
- Corrosion Protection
- Lubricant · Cleaner
- Contact spray

### Special properties

- Excellent lubricating properties
- Excellent moisture displacement
- Protects efficiently against malfunctions caused by moisture and corrosion
- Available with double spray head (DSK)

Silicone-free

500 ml | Pack of: 6 | Order No. 6612011  
500 ml | Pack of: 6 | Art. no. 6612021 (with DSK)  
5 l | Pack of: 2 | Order No. 6000410  
200 l | Pack of: 1 | Order No. 600059

## High-performance Drilling and cutting oil foam

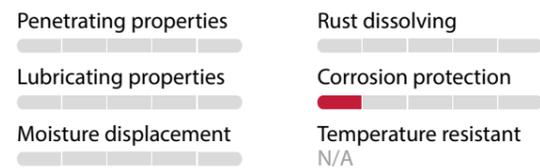

With reliable adhesion and a powerful combination of active ingredients, this foam creates the professional basis for tool-friendly and precise drilling, cutting and milling.

### Applications

- High-quality cutting oil foam for metal processing

### Special properties

- Well-bonding foam
- For alloyed and non-alloyed steels, cast iron, chromium-nickel alloys, copper and their alloys
- Free from mineral oil and sulphur
- Washable with water

500 ml | Pack of: 6 | Order No. 617308

## High-performance Drilling and cutting oil

This oil spray cools and lubricates during machining, drilling, cutting, turning and forming. Surface quality and cutting speed are significantly improved.

### Applications

- High-quality cutting oil for common to moderate cutting applications in metal working

### Special properties

- For alloyed and non-alloyed steels, cast iron, chromium-nickel alloys, copper, titanium, manganese, aluminium and their alloys
- Easily biodegradable
- Free from mineral oil and chlorine

500 ml | Pack of: 6 | Order No. 61730621

# Technical cleaning

## Because professionally cleaned parts work smoothly

Parts on machines, systems, vehicles and the like can become dirty in many ways, e.g. through abrasion, lubricants, environmental influences or storage. Cleaning is essential for long-lasting and trouble-free operation, safety and value retention, as well as a prerequisite for machining or further processing.

Caramba has developed high-performance specialists in the field of technical cleaning especially for professional requirements. In countless cases, they quickly ensure cleaning success in line with requirements, make work easier and faster and protect the material.

## Intensive Brake cleaner

In workshops all over Germany, the Caramba Intensive Brake Cleaner ensures safety. Because only clean brakes can grip properly. This top specialist from Caramba also provides a well-cleaned basis for repair and replacement work.

### Full speed ahead

- Brake cleaner for disc and drum brakes
- Clutch and engine parts cleaner

Caramba Intensive Brake Cleaner cleans and degreases without leaving residues and also removes resinous dirt. It really steps on the gas and delivers tangible efficiency advantages in practical use.

Page 23

## High-performance Industrial cleaner

With its wide range of applications, this professional is the ideal parts cleaner for industry and commerce. Whether oily, gummy or encrusted: Caramba High Performance Industrial Cleaner grabs dirt quickly and reliably.

### One for many cases

- Machine parts cleaner
- Tool cleaner
- Plant parts cleaner
- Component cleaner

The convenience of use also pays off in everyday work. Simply spray the soiled part and let the powerful effect convince you. The cleaner gets the job done – and significantly supports the work in industry and trade in numerous places.

Page 22

**High-performance Industrial cleaner**  
Contains acetone

The special combination of hydrocarbons and polar organic solvents makes this highly effective cleaner an all-rounder for effective cleaning of plants, machines & tools.

**Applications**

- Cleans and degreases machinery parts and surfaces of any kind

**Special properties**

- Dries fast
- Effective without residue
- Removes oily soiling and encrusted, gummy dirt
- Tested by the Physikalisch-Technische Bundesanstalt (Federal Physical-Technical Institute) in Braunschweig
- Lower explosion limit LEL > 1.5 vol. per cent
- Contains acetone
- Free of AOX and halogenated hydrocarbons (CHCs, CFCs)

Silicone-free

500 ml | Pack of: 6 | Order No. 60250001

**Intensive Cold cleaner**

The cold cleaner is the effective professional that quickly and powerfully removes even stubborn dirt from engines etc. – as the perfect basis for clean work.

**Applications**

- Cleans engines and metal parts

**Special properties**

- Cleans deeply
- Reduces the burden on wastewater and the environment
- Removes oil, resin and encrustations
- Separates quickly
- Fully compatible with rubber and sealing materials
- Efficient use in mobile and stationary cleaning facilities
- Free of AOX and halogenated hydrocarbons (CHCs, CFCs)

Silicone-free

500 ml | Pack of: 6 | Order No. 60542803  
25 l | Pack of: 1 | Order No. 60542201

**Intensive Compressed air spray**

Thorough dust removal and cleaning of electronic components, precision mechanics, sensitive measuring technology, keyboards, clockworks & more succeeds as if by itself with this professional solution.

**Applications**

- Removes the finest dust particles from sensitive surfaces

**Special properties**

- Pure and dry compressed gas
- For the cleaning of electronic components/systems
- 360° valve included
- Stable gas pressure until the can is empty
- Flammable
- CFC-free
- Odourless
- Solvent-free

270 ml | Pack of: 6 | Order No. 6285001

**High-performance Electronics cleaner**

Whenever parts such as circuit boards, plugs, relays, light bulb sockets etc. need to be effectively freed from function-impeding dirt, reaching for this powerful cleaner pays off.

**Applications**

- Quick and reliable cleaner for electrical installations and electronic components

**Special properties**

- Cleans and maintains components
- Evaporates without residues
- Ensures optimum contact, prevents leakage current
- Effective against resinified contact lubricants
- For switches, plug-in connectors, relays, printed circuit boards, etc.

500 ml | Pack of: 6 | Order No. 60358542

**Intensive Brake cleaner**  
Acetone-free

Cleanliness is safety – especially on brakes. This specialist gets the job done quickly, specifically and in no time at all.

**Applications**

- Cleans brakes and other vehicle parts

**Special properties**

- Quick cleaning and drying
- Completely without residues
- Degreases without residues
- Free from acetone – neutral to rubber, plastics and coated surfaces
- Free of AOX and halogenated hydrocarbons (CHCs, CFCs)

Silicone-free

# Plant & Special cleaning

## Absolute professional quality for comprehensive cleanliness

You can't make an omelette without breaking eggs – soiling is unavoidable in many commercial and industrial areas. Equally clear: Cleanliness is the key. This is not only a matter of course in the food sector but applies from the shop floor to the stainless steel surface in all kinds of businesses.

Professional cleaning is important for occupational safety, product quality and external appearance. Caramba Profi-Line products are particularly designed for industrial and special cleaning to ensure that it is done perfectly, quickly and effortlessly. Here you will always find the right specialist for a wide range of typical cleaning tasks.

## Intensive Stainless steel cleaner

From stainless steel worktops to aluminium covers, from copper pipes to brass parts: With Caramba Intensive Stainless Steel Cleaner, metal surfaces regain their uniform shine in no time.

Metal surface treatment as a complete package

- Cleaning
- Care
- Protection

The surface specialist makes dirt, lime stains, grease, oils and resins disappear. But it doesn't just clean up temporarily, it has a lasting effect. The antistatic effect prevents rapid dusting, and the cleaner also protects the surfaces from tarnishing and resoiling.

Page 27

## Active Oil stain remover

Where machines and engines work or are maintained, oil and diesel stains cannot always be avoided. Company car parks are also affected time and again. Whether leakage or mishap, with Active Oil Stain Remover stains are no drama.

Simply and reliably powerful against

- Oil stains
- Diesel stains
- Fuel oil stains

Caramba Profi-Line Active Oil Stain Remover is effective on natural and concrete stone, screed, clinker, ceramics and textile floor coverings, among others. It even adheres to sloping driveways without any problems.

And it's so easy and convenient to use that it's a pleasure to apply when needed.

Page 27

## Intensive Tile and hall cleaner

From assembly halls to workshops: This cleaner cleans without compromise where stubborn dirt – e.g. from limescale or oil deposits – often accumulates during work.

Silicone-free

### Applications

- Highly effective against lime contamination

### Special properties

- Concentrate
- Biodegradable according to the OECD standard
- Applicable to factory floors, sanitary rooms, washing stations, etc.
- Can only be used on alkaline-resistant surfaces

pH value  
**< 0.5 concentrate**

Mixing ratio  
**3-20% with water**  
(depending on degree of soiling)

5 l | Pack of: 1 | Order No. 5281050  
25 l | Pack of: 1 | Order No. 5281252

## Intensive Workshop cleaner

Oil, grease & much more: This specialist handles the typical types of soiling in workshops reliably & quickly.

Silicone-free

### Applications

- Thorough hall, floor and plant cleaning

### Special properties

- Concentrate
- Excellent removal of oil, grease, and dirt
- Environmentally friendly, and biodegradable according to the legal decree for the law on washing powder and cleaning agents
- Can be implemented manually or by machine
- De-emulsifying (automatic separation of oil and grease)

pH value  
**12.0**  
(5% in water)

Mixing ratio  
**3-20% with water**  
(depending on degree of soiling)

5 l | Pack of: 1 | Order No. 5447060  
25 l | Pack of: 1 | Order No. 5447252

## Intensive All purpose cleaner

For a wide range of cleaning tasks in all kinds of industrial plants: When effect and economy count, the powerful all-purpose cleaner is the ideal choice.

Silicone-free

### Applications

- Thorough and gentle cleaning of buildings, commercial kitchens, vehicles and industrial facilities

### Special properties

- Concentrate
- Removes even the most stubborn dirt, such as oil, grease, nicotine, soot, wax, soap, ink, insects, etc.
- Can be implemented manually or by machine
- Biodegradable
- Approved for use in the food processing industry (NSF C1)

pH value  
**approx. 11.3**

Mixing ratio  
**1:5 to 1:50 with water**  
(depending on degree of soiling)

10 l | Pack of: 1 | Order No. 6901310  
25 l | Pack of: 1 | Order No. 6901021

## Intensive Stainless steel cleaner

Cleanliness, care, shine and protection against tarnishing – this cleaner provides visible and lasting effects in no time at all.

Silicone-free

### Applications

- Cleans and protects all metallic surfaces indoors and outdoors

### Special properties

- Removes dirt, lime stains, rust films, greases, oils and resins
- Protects against soiling and corrosion
- Effective on stainless steel, aluminium, copper and brass
- Do not use on high-gloss polished surfaces
- Antistatic and maintaining
- Approval for food processing industry (NSF A7)

500 ml | Pack of: 6 | Order No. 63308401  
5 l | Pack of: 2 | Order No. 63308501

## Intensive Machine and part cleaner

Cleanliness of machines & components is important for function and efficiency. This special cleaner creates the basis for professional maintenance.

Silicone-free

### Applications

- Cleaning machines, engines, tarpaulins, chassis, underbodies, etc.

### Special properties

- Concentrate
- High dirt dissolving power
- Removes oil, grease and other stubborn soiling
- Suitable for spraying and high-pressure processes

pH value  
**12.8**

Mixing ratio  
**Undiluted or up to 1:50 with water**  
(depending on degree of soiling)

10 l | Pack of: 1 | Order No. 6910101

## High-performance Special solvent

From adhesive labels to tree resin: This top specialist saves tedious work and solves sticky cases with ease.

### Applications

- Removes stubborn dirt without any residues

### Special properties

- Detaches stickers, glue residues, stains of paint, etc. from hard non-absorbing substrates
- Effective without residue
- Approved for use in the food processing industry (NSF K3)

500 ml | Pack of: 6 | Order No. 66140704

## Active Oil stain remover

When some oil is spilled, this helper comes into play: easy to use, professional effect.

### Applications

- To remove oil stains, fuel oil and diesel fuel from parking areas, driveways, and garage floors

### Special properties

- For all absorbing and non-absorbing substrates
- Suitable for natural stone and concrete, clay, pumice, screed, clinker, ceramic and textile floor covering
- Good adhesion and strong effect
- Do not use on bitumen, asphalt and slate
- Apply on dry surfaces

1 l | Pack of: 6 | Order No. 606801

# Cleaning & Care

## Top results not only for the eye

In workshops and detailing shops, but also in fleet maintenance, you can rely on the Caramba Profi-Line "Cleaning and Care" range. Because where perfection, ease of work and simple handling as well as sparkling clean results count, Caramba is ready for action. Whether for the interior or exterior, for rims or upholstery, glass or the ventilation system – with the Caramba Profi-Line, the visual appeal is restored in no time while preserving value. Economical and with professional quality. Finally, the products for workshops are also suitable for resale to end customers and thus show themselves to be additional revenue generators.

## Intensive Glass cleaner foam

This special cleaner provides full visibility. The Intensive Glass Cleaner Foam tackles typical soiling on both the outside and inside of windows. Insect remains, environmental dirt, fingerprints and coatings disappear in the blink of an eye.

Everything crystal clear again with the double effect

- Glass cleaner
- Anti-fog spray

Even for stubborn dirt: simply spray on, let it work, wipe off and see clearly without streaks. At the same time, the subtle lemon scent provides a pleasant freshness in the interior.

Page 31

## Active Rim cleaner

Bright shiny rims have an enormous effect on the overall look. However, rims are particularly exposed to dirt, e.g. from brake abrasion, road salt residue or road grime. No problem with Caramba Active Rim Cleaner pH neutral.

Makes rims shine and customers happy

- Highly effective cleansing foam
- For steel, aluminium, chrome and painted rims

The strong rim specialist quickly restores the shine. Engineered to the last detail: The well-adhering foam shows which surface has already been treated. The cleaning progress is indicated by the colour change from blue to red.

Page 30

## Intensive Cockpit care

Silicone-free

Gentle cleaning and lasting cleanliness: The antistatic effect keeps dust particles at a distance.

Applications

- Cleaning, protection and care of plastic parts and smooth leather in the vehicle interior

Special properties

- Suitable for paint shops
- Antistatic effect
- Removes grey haze
- Matt surfaces remain matt
- Contains high-quality vegetable wax components forming a caring protective film

Silicone-free

500 ml | Pack of: 6 | Order No. 61310001

## Intensive Cockpit care

Contains silicone

This effective cleaning and care emulsion protects, among other things, against fading due to sun exposure – and is therefore also ideal for convertibles.

Applications

- Cleaning, colour refreshing and care of plastic parts and smooth leather in the vehicle interior

Special properties

- With antistatic and dirt-repellent effect
- With UV protection against bleaching
- Particularly gentle cleaning thanks to water-based foam
- Contains silicone

500 ml | Pack of: 6 | Order No. 6161051

## Active Perfect Climate

This special disinfectant works directly in the ventilation ducts and thus ensures pleasantly fresh air in the car.

Applications

- Air system cleaner for hygiene and freshness in the vehicle

Special properties

- Disinfecting active ingredient
- Effective against enveloped viruses (including HIV, HCV, HBV, corona viruses (SARS-CoV-1 and SARS-CoV-2)) according to EN 14476:2019
- Eliminates odours due to dust and dirt deposits, bacteria and fungi
- Provides a fresh scent in the entire interior

100 ml | Pack of: 20 | Order No. 64501101

## Intensive Magic Wonder

Gloss finishing

Amazingly easy to achieve shiny results with a protective effect – Magic Wonder works wonders on smooth surfaces.

Applications

- Cleans and finishes smooth surfaces

Special properties

- Maintains, cleans, and protects all in one step without preliminary cleaning
- Optimal gloss finish
- Protective effect for months
- Can be used on paint, chrome, plastic materials, etc.
- Do not use on grained surfaces
- Contains silicone

400 ml | Pack of: 6 | Order No. 6311161

## Active Rim cleaner

This powerful cleaning foam makes even heavily soiled rims shine again in no time.

Applications

- Suitable for all aluminium, steel and chrome rims as well as for painted rims

Special properties

- Removes extremely stubborn dirt such as brake dust, road salt deposits, etc.
- Active cleaning with colour changing effect
- Free from acid, safe for brake discs, paints, rubber and plastics

pH value  
8.0

500 ml | Pack of: 6 | Order No. 6270064  
10 l | Pack of: 1 | Order No. 6270051

## Intensive Glass cleaner foam

If you want to achieve clean, streak-free glass surfaces quickly and effortlessly, reach for this professional foam.

Applications

- For internal and external cleaning of glass and all smooth surfaces

Special properties

- Attacks insect remains, streaks and deposits
- Removes stubborn dirt and organic residue
- Prevents window fogging

500 ml | Pack of: 6 | Order No. 6290305

## Active Foam cleaner

Plastic, upholstery and smooth leather clean and cared for in no time at all – this cleaning specialist shows its strengths to the full in professional car detailing.

Applications

- Highly effective cleaning foam for the vehicle interior

Special properties

- Perfect for renovation
- Can be used on all washable surfaces
- Removes stubborn dirt
- Gentle to materials
- Biodegradable

500 ml | Pack of: 6 | Order No. 64010601

# Corrosion protection & Preservation

## Quality is the best protection factor

Corrosion of metal parts and surfaces is a threat to the safety, function and value of vehicles, components, gates, equipment, railings and many more goods. Often the unsightly appearance also has a negative aspect. But the right remedies for prevention and repair are available to fight decay and deterioration: the Caramba Profi-Line for corrosion protection and preservation.

From simple application to fast, powerful action – the products offer exactly the properties that professionals in the field of repair, bodywork, painting and locksmithing demand and appreciate at work. They reliably contribute to high-quality, long-lasting results.

## High-performance Zinc Spray Alu Light

When effect and appearance need to complement each other, Caramba High Performance Zinc Spray Alu Light is the solution. It protects metal parts from corrosion and can be painted over very well.

The colour tone also makes it an ideal final coat on galvanised parts.

Dual use – simply first class

- Strong rust protection
- Protective final coat in the tone of hot-dip galvanising

Caramba High Performance Zinc Spray is ideally suited for the repair of galvanised forged parts, fencing, crash barriers or ventilation shafts – not least if a final coat of paint is to be dispensed with and thus the colour of the rust protection is also important.

Page 35

## High-performance Corrosion protection wax

Reliable material and component protection during transport and storage is an absolute domain of this high-quality specialist. It also preserves tools as well as metallic parts of machines, engines and aggregates and prevents corrosion damage.

For value retention and functional safety

- Tool preserver
- Transport protection
- Storage protection

Its thin, non-slip protective film displaces moisture and is stable against colder and higher temperatures. Good to know: The protective wax is also effective on aluminium, copper, brass, zinc as well as phosphated and chromated surfaces.

Page 34

## High-performance Rust protection primer red brown

This extremely powerful professional primer filler provides the perfect base for top coats in commercial refinishing.

### Applications

- Special rust protection primer
- Primer filler for paint repair

### Special properties

- Good isolation of the transition zones of ground and filled areas.
- Can be painted over with common nitrocellulose and water-based paints
- Corrosion protection > 400 h according to DIN 53167

Corrosion protection

Dust-dry  
approx. 10- 15 minutes

Touch-dry  
approx. 15- 20 minutes

Temperature resistant  
up to +140 °C (short-term) up to +80 °C (long-term)

500 ml | Pack of: 6 | Order No. 691509

## High-performance Adhesive primer light grey

The professional primer for materials from steel to aluminium ensures high efficiency in use due to short drying times and fast recoatability.

### Applications

- Light primer for protection against corrosion and weathering
- Paint repair and surface finishing

### Special properties

- Good adhesion and excellent coverage
- Resistant to petrol, light-fast, weather-resistant
- Can be painted over with common nitrocellulose and water-based paints
- Corrosion protection: 192 h according to DIN 53167

Corrosion protection

Dust-dry  
approx. about 10 minutes

Touch-dry  
approx. about 20 minutes

Temperature resistant  
up to +200 °C (short-term) up to +130 °C (long-term)

500 ml | Pack of: 6 | Order No. 6620441

## High performance Zinc Spray Alu Light

This strong protection simultaneously provides the visual effect of hot-dip galvanising and is therefore also very suitable as a final coat.

### Applications

- Lasting galvanic rust protection for metals of any type

### Special properties

- Can be welded through and painted over
- Harmonised to the hot galvanising colour hue
- Corrosion protection > 144 h according to DIN EN ISO 9227

Corrosion protection

Dust-dry  
approx. about 8 minutes

Touch-dry  
approx. 20- 25 minutes

Temperature resistant  
up to +200 °C

500 ml | Pack of: 6 | Order No. 60768505

## High-performance Zinc Spray Matt Grey

With its particularly high pure zinc content, this specialist is ideal for paint preparation and for repairing damaged zinc coatings.

### Applications

- Long-lasting rust protection with filler properties

### Special properties

- Can be welded through and painted over, ideal as a primer
- The dried coating contains more than 99% high-grade zinc
- Suitable for repairing parts galvanised according to DIN EN ISO 1461
- Corrosion protection > 1,140 h according to DIN EN ISO 9227

Corrosion protection

Dust-dry  
approx. about 8 minutes

Touch-dry  
approx. 20- 30 minutes

Temperature resistant  
up to +500 °C

500 ml | Pack of: 6 | Order No. 60388505

## High-performance Corrosion protection wax

This preservative protects stored parts as well as equipment, tools and machinery, for example in the construction industry and agriculture.

### Applications

- Preservation product for storage and transport of painted and non-painted metal parts

### Special properties

- High penetrating properties
- Forms an elastic film that remains flexible even in cold environments
- Displaces moisture
- Salt water resistant
- Can be removed with a cold cleaner and high-pressure equipment

Corrosion protection

Dust-dry  
N/A

Touch-dry  
N/A

Temperature resistant  
up to +100 °C (drip-proof)

# Skin protection program

## Strong skin protection for all those who really get to work

In trade and industry, a lot of things are real manual labour. Those who work hard need and deserve professional skin protection.

That's exactly what Caramba delivers – with high-performance, skin-friendly products for protection, cleanliness, care and disinfection. The products complement each other as needed, so that skin protection literally goes hand in hand. In addition, there are specialists for different requirements, e.g. according to the degree of soiling.

The program is rounded off by a customised dispenser range for hygienic use with a savings effect. Result: The Caramba skin protection program gives a good, healthy feeling and keeps hands ready for action. Workers appreciate this just as much as employers.

### Hand Protect Before and in between

Caramba skin protection prevents and provides the protection factor against a wide range of work substances that can stress and damage the skin.

### Hand Clean During and after work

Caramba hand cleansing creates clean hands with effective, skin-friendly solutions for clean work – and of course for the end of the day.

### Hand Care After work

Caramba skin care ensures a balanced moisture level, counteracts dehydration and promotes skin health with a regenerative effect.

### Hand Disinfection After each cleaning and in between

Caramba hand disinfection is effective against viruses such as SARS-CoV-2 and bacteria, making it an important means of maintaining work ability and for prevention.

Hand  
Protect

## Hand Protect

Skin protection lotion

Skin protection against aqueous and non-aqueous working substances such as cooling lubricants, oils, greases, adhesives, etc.

1 l soft bottle | Pack of: 6 | Order No. 8114060001

Hand  
Clean

## Hand Clean Soap

Hand soap

Against light hand soiling, e.g. in administration, warehouse, etc.

1 l bottle | Pack of: 10 | Order No. 8114010001  
10 l canister | Pack of: 1 | Order No. 8114010010

Hand  
Clean

## Hand Clean Medium

Hand cleaner

Against medium to heavy soiling by oils, greases, dusts, soot, printing inks etc.

500 ml can | Pack of: 10 | Order No. 693405  
10 l bucket | Pack of: 1 | Order No. 6980510

Hand  
Clean

## Hand Clean Strong

Hand cleaner

Effectively removes heavy soiling from oil, grease, lubricants, dust, graphite, soot, printing inks, etc.

1 l bag | Pack of: 10 | Order No. 8114030001  
2 l soft bottle | Pack of: 6 | Order No. 8114030002  
3 l can | Pack of: 6 | Order No. 8114030003

## Soft bottle dispenser 1 l & 2 l

With plastic handle

Maximum hygiene due to minimised risk of contamination and germination of the product, because direct contact between dispenser and product is avoided.

Dimensions: H x W x D in mm: 335 x 127 x 130 | Art. No. 8634791000

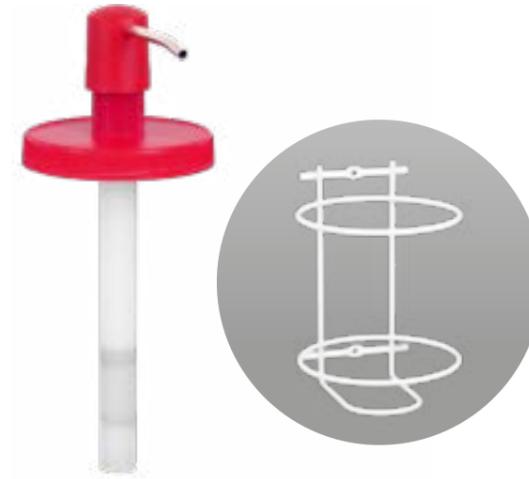

## Soft bottle dispenser 1 l & 2 l

With metal bracket

Maximum hygiene due to minimised risk of contamination and germination of the product, because direct contact between dispenser and product is avoided.

Dimensions: H x W x D in mm: 289 x 125 x 128 | Order No. 8634891000

## Top dispenser 3 l can

With or without wall bracket

Dispenser dimensions: Ø: 128 mm | Order No. 8635071000 w/o wall bracket  
Wall bracket dimensions: H x W x D in mm: 226 x 162 x 166 | Order No. 8635061000 with wall bracket

## Top dispenser 10 l bucket

Suitable for all 10 l buckets

Dimensions: Ø 264 mm | Order No. 8635081000

## Soap dispenser 1 l

Suitable for direct decanting of liquid soaps from large containers

Dimensions: H x W x D in mm: 215 x 100 x 90 | Order No. 8636641000

## Paste dispenser 2.5 L (Hand Clean Medium)

Suitable for all non-flowing hand cleaner pastes

Dimensions: H x W x D in mm: 340 x 150 x 150 | Order No. 8634861000

## Disinfectant dispenser 0.5 l & 1 l

With metal bracket

Dimensions: H x W x D in mm: 282 x 105 x 92 | Order No. 8636651100

# Surface disinfection

## A head start through cleaning and disinfection in one step

Handles, storage surfaces, operating elements, small parts and much more – hands come into contact with all kinds of surfaces at work. Hygienic disinfection is a must here, as the corona virus has once again made clear. At the same time, a clean working environment is indispensable, if only for the working atmosphere and the external image. Disinfection and looks: Caramba convinces with the 2 in 1 effect!

## TEGEE Sol without fragrance

Ready to use

Caramba TEGEE Sol combines fast cleaning action with strong disinfecting power. For thorough cleanliness and hygiene, one operation is sufficient.

- Reliable disinfecting against enveloped viruses (such as the corona virus), among others
- Easily removes oils, grease, wax, soap etc.
- Extremely material compatible even with Plexiglas, Makrolon or LCD screens (touch panels)

The disinfectant cleaner TEGEE Sol is ideal for all washable surfaces, especially plastics of all kinds. It is ready to use and saves time and money when used for cleanliness and disinfection thanks to the 2 in 1 effect.

# NSF certified products

## In contact with food? Certainly!

Caramba solutions also score well in use in the food industry and food processing. Our highly effective products are optimised for use in this industry – and certified by the National Sanitation Foundation (NSF).

### High-performance Grease with PTFE

The grease is extremely penetrating and pressure resistant and is also ideally suited for the maintenance of complex machines with continuous operation.

NSF product category: H2  
➤ For more information, see page 9

### High-performance Universal spray H1

This all-rounder convinces as a fine lubricating oil and, for example, for the professional care of tools and parts.

NSF product category: H1  
➤ For more information, see page 18

### Intensive All-purpose cleaner Concentrate

For a wide range of cleaning tasks in industrial plants of all kinds: When effect and economy count, the powerful all-purpose cleaner is the ideal choice.

NSF product category: C1  
➤ For more information, see page 27

### High-performance Special solvent

From adhesive labels to tree resin: This top specialist saves tedious work and solves sticky cases with ease.

NSF product category: K3  
➤ For more information, see page 27

### High-performance Silicone spray grease

Pure versatility: The professional spray grease lubricates roller bearings, slide rails etc., it is water-repellent and also powerful in electrical switch maintenance.

NSF product category: H1  
➤ For more information, see page 12

### High-performance Silicone spray

The all-rounder makes jammed or squeaky connections work again and ensures value retention and longevity through its care effect.

NSF product category: H2  
➤ For more information, see page 19

### Intensive Stainless steel cleaner

Cleanliness, care, shine and protection against tarnishing – this cleaner provides visible and lasting effects in no time at all.

NSF product category: A7  
➤ For more information, see page 27

# Accessories

**Quality to the last detail**  
Inconspicuous, but important for good work: the accessories from Caramba. The pouring solutions and the pump sprayers are practical, handy and reliable – here too Caramba convinces with quality.

## Pouring tap for plastic canisters

Suitable for 5 l and 10 l (DIN 51), 25 l (DIN 61) and 60 l (DIN 71)

For 5 l and 10 l canisters	Pack of: 1	Order No. 689602
For 25 l canister	Pack of: 1	Order No. 15300021
For 60 l canister	Pack of: 1	Order No. 689601

## Pouring tap for metal drums

3/4": Suitable for 60 l and 200 l metal drums

For 60 l and 200 l drums	Pack of: 1	Order No. 15313003
--------------------------	------------	--------------------

## Pump sprayer 1 l

Pressure pump sprayer for Caramba all-purpose cleaner, brake cleaner and rim cleaner

- For the ready-for-use solution
- Empty

For all purpose cleaner	Pack of: 1	Order No. 69320304	Caramba pump sprayers are only compatible with Caramba products. Faultless function with competitor products cannot be guaranteed.
For brake cleaner (acetone-free)	Pack of: 1	Order No. 69320104	
For rim cleaner	Pack of: 1	Order No. 69320204	

# Research & Development

## We set new standards and constantly put quality to the test

Mastering challenges with innovative new recipes, testing and improving existing products: To achieve this, Caramba's in-house research and development department uses advanced equipment and processes. 20 scientists and experts in our three research laboratories develop and optimise recipes – and consistently put them to the test.

For users, this means not only proven product quality, but also transparency in product selection. Which Caramba product lubricates best, how strong is the corrosion protection effect of a product? Last but not least, the scientific tests make the properties of our products comparable – those who are looking for the ideal solution can make the best choice for the respective requirements in a well-informed manner.

Selected test methods from the Caramba laboratories

## Lubricating properties: Four-ball apparatus (VKA)

Our scientists determine the lubricity of formulations with our own equipment according to DIN 51350.

- The device consists of a running ball rotating on three lubricated stationary balls.
- The test pressure of the track ball on the stationary balls is gradually increased.
- The so-called VKA value is reached when the lubricating film tears and the balls bond as a result.

With the VKA value, we can make clear statements about the lubricity of selected products. Wear protection is strongest with our high-performance grease with PTFE, and our classic Super Plus also achieves top values.

## Corrosion protection: Salt spray test and condensation water test

In these test procedures, treated metallic materials are deliberately exposed to corrosion-promoting influences such as the sea climate.

- In the salt spray chamber, steel sheets are sprayed with water vapour salt mist (EN ISO 9227).
- The condensation water test (EN ISO 6270) focuses on the effect of condensation water on metallic surfaces.
- The percentage of the surface that is corroded within a certain time is recorded.

The methods provide scientifically sound results with significance. In the salt spray test, for example, Caramba Super Plus sets standards with only 5% corrosion after 14 hours, even in a competitive comparison.

➤ For more information on all test methods, please visit our website at <https://www.caramba.eu/en/>.

## Technical applications

### Brand of the century

Caramba is a legend... a German brand known by everybody... and this for generations. The success story begins with the ingenious invention of a graphite-containing spray oil called Caramba. It removes rust, lubricates and protects. Today, entire product ranges can be found under the umbrella of the brand – both for the private user and industry and trade. Chemical peak products for cleaning and protection of material finishes. For over 120 years.
